CAREER OBJECTIVE

Computer Science Engineering (Artificial Intelligence & Machine Learning) student with a strong interest in AI, Machine Learning, Robotics, and Software Development. Passionate about building innovative real-world solutions using Python, Computer Vision, and IoT . Seeking an opportunity to contribute to a dynamic organization while continuously enhancing my technical and problem-solving skills.

Education

Bachelor of Engineering - Computer Science Engineering (AI & ML) 2028

2 PUC – Mahadeva PU college 2024

Technical Skills

Programming: python,java,C

Soft Skills

Team work

Leadership

Problem Solving

Projects

AI Blind Assistant using Raspberry Pi

- Developed an AI-powered smart assistant for visually impaired users
- Integrated object detection and computer vision to identify surrounding objects
- Implemented voice guidance for real-time navigation assistance
- Used Raspberry Pi, Python, OpenCV, and AI techniques to improve accessibility

Smart Street Light Automation System

- Designed an IoT-based smart street lighting system using Raspberry Pi
- Automated street lights using IR sensors and an LDR sensor to detect vehicles and ambient light

- Controlled lights through a relay module, reducing unnecessary power consumption
- Developed the system using Python, Raspberry Pi, sensors, and relay-based automation
- Focused on improving energy efficiency and enabling smart city infrastructure

Certifications

Python programming2026

Introduction to Databases2026

Achiements

Mini project exhibition

Hackathon
